Online student learning

Available in light and dark skin versions

SAM Online site licence included

PAT — the Pediatric Auscultation Trainer — provides engaging instruction for pediatric auscultation across all academic levels. Instructors will enjoy the extensive range of physiological sounds, while students will be able to use their own stethoscope — helping build confidence in their auscultation and assessment skills. PAT is designed with a host of pediatric-specific conditions, audible at their precise anatomical locations. Whether high school or graduate level, PAT is the complete pediatric auscultation trainer for students.

718-8850 - PAT, light skin model; 718-8950 - PAT, dark skin model
