

SimSCOPE®

HYBRID SIMULATOR

Simple one-on-one student to patient interaction

Wifi upgrade available allowing for remote selection of sound scenarios

Listen at anatomically correct auscultation sites

Easy to use software enables maximum flexibility

Software adapts to you allowing virtually unlimited site selection and scenarios

Utilizes the extensive Cardionics proprietary heart, lung, bowel, and bruit sounds library

Quick change AAA battery

The **SimScope** is the most instructive device available for auscultation and assessment in a patient simulation. With 30 physiological sounds, and packages offering up to 90 additional sounds to choose from, instructors will be able to customize patient parameters according to their curriculum, while retaining the real-life interaction between the student and Standardized Patient. The SimScope is designed to be incredibly easy to operate, while containing the largest library of physiological sounds in the industry — all to keep the simulation as educative and fluid as possible.

SimScope Catalog # 718-3400; SimScope WiFi #718-3410

Technical Support: Unlimited

Warranty: One year – parts and labor

Awards received for SimShirt® System technology which is used in Bionic Hybrid Simulator™, SimScope®, SAM Basic®, and PAT Basic® systems
